Roma Saleyards Truck Wash

Avdata Keys

Customers can purchase two different Avdata keys from Council's Customer Service Centres:
1. A standpipe key (to access potable water)
2. A wash down key (for washing a truck)

WASH DOWN LOCATIONS:
• Roma Saleyards – Southern side of the Warrego Highway on the eastern approach of Roma
• Injune Rodeo Grounds – Eastern side of the Carnarvon Highway, on the southern approach into Injune.
Wash down keys can only be obtained from the Roma and Injune Customer Service Centres.

Under Queensland's *Biosecurity Act 2014,* all persons have an obligation to take reasonable and practical measures to prevent or minimise the biosecurity risks associated with their activities or dealings with the carriers of invasive plants.

Vehicles or machinery operating or moving through weed infestation can become contaminated with invasive plant seeds or other reproductive material. Cleaning down vehicles and machinery when moving between different locations reduces the risk of spreading invasive plants and soil borne pests and diseases.

STANDPIPE LOCATIONS:
• **Roma** - Located at 192 Currey Street
• **Surat** - Located out the front of the Council Depot on Alexander Street
• **Injune** - Located at the Injune Rodeo Grounds
• **Mitchell** - Located on Oxford Street on the Bore Reserve
• **Wallumbilla** – Located at 65 Burke Street. *Please note there is a 'soft cap' on the amount of water that can be taken from the Wallumbilla Standpipe, and that is 100-200 kilolitres per day. This cap is there to ensure no more is taken, as it puts a strain on the infrastructure.*

Standpipes keys are available from all Council Customer Service Centres.

Key points:
• Before a wash down or standpipe can be used, the user needs to obtain an Avdata key from Council's Customer Service Centres.
• Customers pay for the key (non-refundable), as per fees and charges, an account at the end of each month will be sent to the customer to pay for the use of water.
• Wash downs and standpipes are open 24/7, 7 days a week, unless maintenance is needed to be undertaken.
